exercice1:

```
pipeline {  
    agent any  
  
    stages {  
        stage('Generate System Info Log') {  
            steps {  
                script {  
                    def date = sh(script: 'date "+%Y-%m-%d %H:%M:%S"', returnStdout: true).trim()  
                    def hostname = sh(script: 'hostname', returnStdout: true).trim()  
                    def nb_coeurs = sh(script: "grep -c '^processor' /proc/cpuinfo", returnStdout:  
true).trim()  
                    def ram = sh(script: "grep MemTotal /proc/meminfo | awk '{printf \"%d MB\",  
\$2/1024}'", returnStdout: true).trim()  
                    def util_disque = sh(script: "df / | tail -1 | awk '{print \$5}'", returnStdout:  
true).trim()  
  
                    // On crée le fichier dans /var/jenkins_home/tmp pour qu'il soit accessible  
depuis Windows  
  
                    sh """  
  
                    mkdir -p /var/jenkins_home/tmp  
  
                    cat > /var/jenkins_home/tmp/exercice1.log <<EOF
```

Exécution de la pipeline Jenkins Exercice 1

Début d'exécution à `${date}` sur `${hostname}`

Cette machine dispose de `${nb_coeurs}` coeurs de CPU, et `${ram}` de RAM.

Le disque principal est utilisé à `${util_disque}`.

```
-----  
  
EOF  
  
        """"  
  
        echo "Fichier exercice1.log généré dans /var/jenkins_home/tmp"  
  
    }  
  
}  
  
}  
  
}  
  
}
```

exercice2:

```
pipeline {  
    agent any  
  
    tools {  
        nodejs 'nodejs-18'  
    }  
  
    stages {  
  
        stage('Checkout') {  
            steps {  
                echo "Récupération du code depuis GitHub"            }  
        }  
    }  
}
```

```
git branch: 'main', url: 'https://github.com/tojo2803/CiCdProject.git'
```

```
}
```

```
}
```

```
stage('Install Backend') {
```

```
  steps {
```

```
    dir('Backend') {
```

```
      echo "Installation des dépendances backend"
```

```
      sh 'npm install'
```

```
    }
```

```
  }
```

```
}
```

```
stage('Run Backend Tests') {
```

```
  steps {
```

```
    dir('Backend') {
```

```
      echo "Lancement des tests unitaires et d'intégration"
```

```
      sh 'npm test'
```

```
    }
```

```
  }
```

```
}
```

```
}
```

```
post {
```
